Index

Vol 1 Nos 1–5
December 1991–December 1992

SUBJECT INDEX

advantage 183
Aligning information systems with business strategy 205
The ASB Bank: an IT case study in sustained competitive advantage 165

business processes 116
business re-engineering 243
business strategy research 191
Business strategy workshop – a framework for planning 227

The CIM–IS partnership: integration for competitive advantage 4
competitive advantage 126
competitive strategy 152
competitive use of information technology 29
Computer-based information systems for development planning: the significance of cultural factors 250
computer-integrated manufacturing 4
concept analysis 93
conceptual framework 116
A contingency model of EDI's impact on industry sectors 143
control 258
corporate strategy 205
culture 250
Customer-oriented strategic systems 29

decision support systems 126
development administration 250

Economic aspects of requirements analysis 84
economics 84
EDI see *electronic data interchange*
effectiveness 266
electronic banking 290
electronic data interchange 143
electronic markets 278
An empirical investigation of information technology structure, control and corporate governance 258
enterprise engineering 243
Enterprise engineering: building 21st century organizations 243
environment 152
expert systems 126

A framework for recognizing patterns when reshaping business processes 116

Global success with electronic banking: the Hongkong Bank and HEXAGON 290
globalization 290
governance 258

implementation 4, 266, 278
The implementation of an electronic market for pig trading in Singapore 278
industry infrastructure 143
industry sectors 143
industry value-chain 143
information engineering 243
information infrastructure 243
information production 84
information systems 4, 84, 183, 250, 266
information systems innovation 29
Information systems issues facing senior executives: the culture gap 57
information systems management 63, 76
Information systems management in Greece: issues and perceptions 63
information systems planning 76
information systems planning process 205
information systems research 191
information systems strategy 205
information technology 84, 258
information technology management 215
Information technology – management's boon or bane? (Editorial) 49
integration 4
inter-organizational information systems 29, 93, 278, 290
inter-organizational systems, see *inter-organizational information systems*
Introducing *The Journal of Strategic Information Systems* (Editorial) 3
IS see *information systems*
IT see *information technology*
IT for competitive advantage: the place of expert systems 126
IT strategy in retailing: organizational change and future direction 134
The ITBE 2000 Initiative: are business schools meeting the challenge of management and IT in the 21st century? 43

Key information systems management issues for the 1990s (Editorial) 178
The key role of applications software make-or-buy decisions 215

learning organization 243
levels of abstraction 116

make/buy decisions 215
management decision-making 84
Modelling corporate information needs: fresh approaches to the information architecture 38

On the concept of inter-organizational information systems 93
organization 134
organizational strategy 4
organizational structure 205
Outsourcing and the trailing edge of technology 181

patterns 116
perspectives 116
phases 116
Process and product success in information systems development 266
The process of strategic information planning 76

Re-engineering becomes the CEO's policy at Mutual Benefit Life 102
requirements analysis 84
resources 84
Re-structuring implications for utilities subsidiaries in the post-privatization era 171
retailing 134

software acquisition systems 215
stakeholder groups 15
Stakeholders of strategic information systems planning: theoretical concepts and empirical examples 15
strategic alignment 205
strategic information 152
strategic information systems 29
strategic information systems planning 15
Strategic IT issues: the views of some major IT investors 183
strategic management 63
strategic planning 76
strategic visioning 243
strategy 134, 183
Strategy: an information systems research perspective 191
success 266
Supporting strategic information needs: an empirical assessment of some organizational factors 152

Taking technology opportunities to the business 106
technology management 63, 205
training 4

user satisfaction 266
